[vc_column_text css_animation="fadeIn"]**EnTrackRealtime** is a comprehensive Work-in-Progress Tracking System designed and developed for aircraft engine service companies and MROs for faster service turnaround and management. Enabling process mapping and workflow creation, ensures physical tracking of material, resources in a day to day operations and provides real-time progress visibility to the executive management in dashboards. EnTrackRealtime also enables the capability to manage the exceptions by automatically sending alerts to maximize the efficiency, reduce lag time for missing tools or parts and optimize turnaround time.[/vc_column_text]
